

COBALT.

SourcIT

Cobalt is one of Ireland's leading ICT services and solution providers. We're passionate about outstanding customer service - which inspires our flexible, friendly approach to business. Our SourcIT service helps organisations with IT product sourcing, financing and asset management which enables control of the complete IT portfolio, in a cost effective way.

We provide customers with commodity IT products, infrastructure, datacentre and networking solutions combined with all the services required to design, deliver and support these on premise or in the cloud.

Our comprehensive SourcIT managed service encompasses the standardisation of commodity hardware and software, SLA driven supply options, image and licencing services and a range of flexible financing products.
